

# LAWRENCE *Vineyards*

Lawrence Vineyards' picturesque view of the Royal Slope is outdone in beauty only by what nature beautifully illustrates in the grapes – *and ultimately the wine* - it produces.

After farming the Royal Slope for more than 40 years, we developed our first block of vineyard in 2003 and haven't slowed down except to enjoy the fruits of our labor in the occasional glass.

In addition to sourcing grapes for some Washington's finest wineries, we also source a portion of our grapes for our own award-winning winery, Gård Vintners.

## **LAWRENCE VINEYARDS: CORFU CROSSING VINEYARD**

Our Corfu Crossing Vineyard is located on the Frenchman Hills overlooking the Saddle Mountains with elevation ranging from 1,365 to 1,675 feet, and the entire vineyard on the southern slope.

Corfu Crossing features a silt loam soil at a depth of 18 to 42 inches on top of fractured basalt. Our soil has very good drainage, which provides us with optimum control over the water intake of the vines. Rows are established north to south, with the vine spacing at 8 feet by 4 feet. We source our water from a well, and our irrigation system features drip at 4-foot intervals.

## LAWRENCE VINEYARDS: LAURA LEE VINEYARD

The Laura Lee Vineyard is located on the Royal Slope, southwest of our Corfu Crossing Vineyard. Laura Lee features a southwestern slope overlooking the small town of Royal City.

## SUSTAINABILITY

As stewards of the fine land that Mother Nature so generously offers to us, we employ sustainable practices each day so that we can extract the greatest rewards our vineyard has to offer year after year, while

respecting the source of our good fortune.
